FOREWORD

This publication replaces the Basic Economic Data for Idaho published in October 1982 and September 1984. This issue is a supplement to the March 1978 and December 1981 issues, which contain all previous available data. The series has been compiled in response to the many requests for industrial employment data. It contains a historical record of Idaho's Nonagricultural Wage and Salary Employment by industry, tabulated on statewide, area, and county levels.

We hope the publication of this information will assist private and government researchers in their tasks. A large portion of the data was gathered as a result of the day-to-day activities of the Idaho Department of Employment.

The assistance provideed by Idaho's business community, local Job Service Office managers, and the area employment analysts is greatly appreciated.

Carol A. Johnston
Janell Hyer
Research and Analysis

TABLE OF CONTENTS

Nonagricultural Wage and Salary Employment By:

	Page
Statewide	1
Area	7
County	33

NOTE: Data does not contain farm employment, domestics, nonagricultural self-employed persons, or unpaid family members.

Nonagricultural Wage and Salary Employment is compiled by place of work.
